SMART FANDELIGHT

Taking the standard fan to the next level, Maxim Fandelights are the first premier stylings of fans within decorative chandelier frames. Now, Wifi-enabled our Fandelights just got smarter. With many styles and finish options available, transform your interior space with FanDelights!

Maxim's Fandelights feature a proprietary Wi-Fi enabled control that operates the LED light source and fan functions. Control the light intensity down to 10% brightness and adjust the color temperature from a warm 2700K to a bright 5000K range and everything in between. Change the speed of the fan or reverse its direction by remote or compatible smart device. Enhance your energy efficiency by reducing the need for costly HVAC. All this, and regularly automatically enhanced application features, make this fan a FanDelight.

CORONA

Taking the standard fan to the next level, Fandelights such as this one house a Wifi-enabled fan within a decorative chandelier frame. This transitional look features a minimalistic frame finished in your choice of Matte Black or Satin Nickel and a downward directed ring of LED illumination. The Wi-Fi enabled functions control the light intensity, color temperature, and speed of the fan. They can be operated by the remote provided or popular Smart Home applications from your phone or other electronic device.
