

The Crisp Wins 2024 Good Design Award

Maxim Lighting is honored to announce that the **Crisp Surface Mount Collection** has been awarded a [2024 Good Design Award](#) by the Chicago Athenaeum: Museum of Architecture and Design.

The Crisp Collection stands out for its innovative design, offering surface-mounted fixtures that mimic recessed lighting. Engineered to fit 4-0 junction boxes, the fixtures feature snap-in trims in a variety of styles and an optional mud-in ring for a sleek, trim-less finish. Delivering over 1,000 lumens of glare-free light, the collection includes options for warm 3000K single CCT or 5CCT selectable with a concealed switch behind the faceplate, allowing users to customize their lighting with ease.

The Good Design Awards, the oldest and most prestigious global program for design excellence, celebrate innovation, sustainability, and functionality. With over a thousand submissions from leading manufacturers, the Crisp Collection's recognition highlights Maxim Lighting's commitment to merging style and performance.
