The Gusto Wins 2023 Good Design Award

City of Industry, CA – 12.19.23 – Studio M Lighting is thrilled to announce that the César Giraldo-designed Gusto has been honored with a [2023 Good Design Award](#) from the Chicago Athenaeum: Museum of Architecture and Design.

The Gusto takes inspiration from César's longtime fascination with light and modern architecture. The design evokes an artisanal ambiance with sleekly defined curves of hand-blown glass which refract dedicated LED lighting and highlight the undulant silhouettes throughout the fixture. These airy compositions, available in various configurations, including pendants, ceiling mounts, wall sconces, and portable lamps, create the illusion of floating while generously illuminating spaces.

The world's oldest and most universally recognized program for design excellence, the Good Design Awards highlight sustainability, exceptional design work, and unparalleled functionality. Spearheaded by The Chicago Athenaeum, this year's Good Design jury set a high standard for excellence, fielding over a thousand global product submissions from leading manufacturers and design firms. Both an exceptional piece of design work and a personal statement piece, this recognition from the Good Design Awards is a welcomed accolade for the Gusto.
