

# STUDIO•M

## **Studio M on Display at Pasadena Showcase**

*Some works have to be seen in person to take in the full breadth of their beauty. And with Studio M's bespoke series of custom fixtures, just such a beauty is now staged at this year's Pasadena Showcase House of Design.*

*Working with luxury designer Rydhima Brar to create lighting that brings the essence of the outdoors inside, Studio M modified its floral Peony collection in French Gold and altered the arms to feel even more organic. The collection was chosen for its figurative crystal blossom design which compliments the lush magnolias and greenery outside the Pasadena Stewart House. Staged in the colonial estate's **Garden Room** and **Terrace** through **May 21<sup>st</sup>**, this can't-miss collaboration demands to be seen live.*

*Celebrating exceptional local art and design works, the Pasadena Showcase raises funds for local music programs and educational grants which support fellow community nonprofits.*

*On collaborating with Studio M, Rydhima said, "My experience with Studio M has been nothing short of phenomenal. Starting from a huge selection of lighting fixtures that I could choose from down to the customization options that I had, the customer service and finally down to the installation. It was extremely seamless." Curating quality material with quick turnaround and a collaborative, visionary eye are what give Studio M the ability to create exactly these kinds of bold, colorful modifications.*
